

THE WORLD'S BEST ANGLERS TRUST SHIMANO

PRO TIP FROM CAPT. ANDREW CUMMINGS

THE FAST AND THE FURIOUS

As a full time North East fishing guide/captain, specializing in light tackle pursuit of Atlantic bluefin tuna, I depend on Shimano's Butterfly fishing system to consistently hook, land and ultimately tag and release some of the toughest pelagic species that swim our oceans. When speed and 'buckle up' drag pressure counts, nothing can beat the high-speed ratio of Stella spinning and Torsa conventional reels. My clients need to land these fish quickly. Stella and Torsa with Power-Pro and paired with Trevala rods break the spirit of the toughest fish-without breaking your back. The parabolic taper design of the Trevala rods transfer the energy of the fight through the rod, not your body. Trevala rods absorb fighting pressure like no other rod on the market, this allows the angler to put more drag pressure on fish than ever thought possible. Whether tuna are on the feed or on the move, they cannot resist the Butterfly presentation. Nothing compares to the power of a tuna's reaction strike when fishing vertical-nothing counter-punches the power of bluefin like Shimano Stella, Torsa, and Trevala. On the banks, ledges and canyons, the Shimano Butterfly system is leading the fleet and leaving all other methods in the dust.

Capt. R. Andrew Cummings

STELLA®

- > Paladin® Gear Durability Enhancement
- > Propulsion® Line Management System
- > Aero Wrap® II Oscillation
- > S® Concept With Twin Bearing Drag
- > Cold Forged Aluminum Spool

TORSA®

- > High Efficiency Gearing (HEG®)
- > Rapid Fire® Quick Change Drag Cam System
- > Ergonomic Grip Power Handle
- > Super Stopper®
- > A-RB® (Anti-Rust Bearings)

TREVALA® Jigging Rods

- > Shimano® TC4 Construction®
- > New Concept Fuji® Alconite® or Hardloy® Guides
- > Fuji® Reel Seat
- > Gudebrod™ Thread Wrapped
- > Guides
- > Designed for use with Shimano® Butterfly® Jigs.
